

Granite Valley Stone Company Ltd.

THE RIGHT CHOICE FOR ARCHITECTURAL SUCCESS

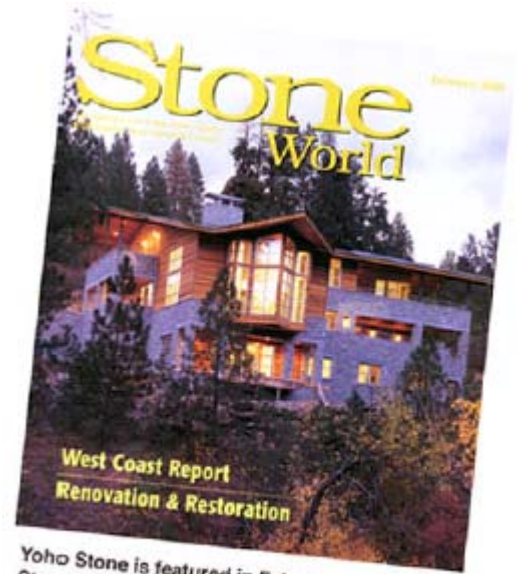

Granite has been a feature of architecture since the Renaissance, and for good reason!

It is the material chosen when permanence, beauty, and complete freedom from deterioration and maintenance are prime requirements. As a potential supplier to your project, we would like to provide you with some background information on our company and our natural stone products which are manufactured in Canada from Vancouver Island granite.

More than any other material, real granite will increase the perceived value of any project by many multiples of its true cost.

- **We have supplied numerous successful projects** in the Pacific Northwest.
- **We work with architects and builders** to create cost effective, elegant and timely solutions in stone.
- **We have our own quarries**, as well as a "state of the art" granite fabricating plant.
- **We do both interior and exterior work.** Our skilled craftsmen can translate your ideas to reality, whether you require exterior stone cladding, an outdoor water feature, split stone fireplace facing or custom kitchen countertops.

Granite Mountain Stone Company is focused on providing our dealers with full project solutions, including advice on product specifications, design and appropriate stone use. Custom homes are our speciality. Builders, designers and project specifiers are particularly invited to obtain our product information. Granite Mountain Stone Company has dealers and distributors in some regions. Please contact us so that we may help you further.

Yoho Stone is featured in Feb. 2000 Stone World Magazine, published in New York and circulated to 90 countries worldwide.

Granite Mountain Stone Company

STONE PRODUCTS

Split-Face Cladding:

Our Mountain Classic

Traditional, Affordable and Unforgettable: Our premium **Mountain Classic Random Granite Cladding** is a precision “split-face” machine manufactured walling stone. A contractor’s favorite, packed in boxes. Cladding comes in two popular sizes, **Mason’s Blend** and **Large Random**. Our veneer is always 4”-5” thick, with random height and width.

Advantages:

- Consistent appearance throughout the project.
- All stone sized to go on the wall — no waste.
- No risk of weathering- rusting or bleeding - from untested stone.
- Reliability of unlimited supply from reputable manufacturer.

Granite Coping Caps:

The Crowning Touch

Our handsome granite wall and post copings (wall and post caps) are cut from granite quarry blocks, and match our cladding. The edges and tops are chiseled and flamed for a rustic, hand-split look. Standard thickness are 3 and 4 inch. Any size is available.

Granite Paving & Tile:

Beautiful & Indestructible

Tuscany in Canada: Our unique Plaza granite paving tiles — Granite Mountain Tuscan Tiles — are 2’ by 2’ by 2” thick, cut in Granite Mountain Glacier Grey with flamed finish. We are one of only a few companies in Canada who can cut such a large rustic tile. We cut tiles to any Dimension for laying effect.

Granite Countertops:

Lasting Interior Beauty

Granite countertops in the kitchen and bathroom make the ultimate statement in design and lifestyle. Beautiful, durable and easily maintained, they are a natural best choice.

Stone Design Elements:

Furniture & Accessories

There is an elegant alternative to concrete! Granite fireplaces, keystones, door surrounds, benches, bollards, stair treads, bridges, water features and other accessories are cut on our giant stone saws.

Granite Mountain Stone Company

CORPORATE RESUME

CONTEMPORARY MANAGEMENT & TECHNOLOGY

• THE COMPANY

Granite Mountain Stone Company is a new Canadian natural stone products manufacturer and wholesale supplier. The company operates a modern stone fabrication plant in Courtenay, British Columbia and delivers to dealers throughout the Western United States.

• THE STONE

Granite has been an element of architecture since the Renaissance. It is chosen when permanence, beauty and complete freedom from deterioration and maintenance are prime requirements. Granite is recognized worldwide as a design element which enhances the perceived value of any project — whether public, private or commercial.

• THE PRODUCTS

Granite Mountain Stone Company uses beautiful stone from its own granite quarries. The company has purchased state-of-the-art stone working machinery from the U.S., Italy and Japan to bring its customers *real stone* products of the highest possible quality. Products include granite veneer cladding (walling), paving, and an extensive list of associated design elements. Items such as tiles, door surrounds, keystones, copings, stair treads, quoins, benches and various other items.

• THE PEOPLE

Our skilled stone cutters utilize both traditional and modern methods to create affordable products from real stone. Many projects involve the use of splitting wedges and hand chisels, before we begin work with our modern sawing, grinding and polishing equipment.

• THE MISSION

At Granite Mountain Stone Company, our mission is to provide our customers and their clients with the *highest possible quality — at the lowest cost possible*. We work with dealers, architects and project specifiers to create cost effective, elegant and timely solutions in stone. We are both quarriers and fabricators, for total project control.

Read the grammar of the Earth in a particle of stone!
